Investment objective

Vanguard FTSE Emerging Markets Shares ETF seeks to track the return of the FTSE Emerging Markets All Cap China A Inclusion Index (with net dividends reinvested) in Australian dollars before taking into account fees, expenses and tax.

ETF overview

The ETF provides low-cost exposure to companies listed on emerging markets, allowing investors to participate in the long-term growth potential typical of these economies. It is exposed to the fluctuating values of foreign currencies, as there will not be any hedging of foreign currencies to the Australian dollar.

Performance return^{A,B,C,D,E} (%)

	ETF gross	Bmk	ETF total	Distb'n	Growth
1 month	1.81	1.01	1.77	0.73	1.04

Quarter ended	Amount (CPU)	Reinvestment price
30 September 2020	48.6810	\$66.9576

Notes

- ^A Past performance is not an indication of future performance.
- ^B Returns assume reinvestment of all distributions. Returns for periods longer than 1 year are annualised. ETF gross returns are before management fees and taxes, but after transaction and operational costs. ETF total return is the ETF gross return less management fees. Index returns do not allow for taxes, management, transaction and operational costs.
- ^C Returns assume that an investor purchased units at Net Asset Value (NAV) and does not reflect the transaction costs imposed on the creation and redemptions of ETF units, brokerage or the bid ask spread that investors pay to buy and sell ETF securities on the Australian Securities Exchange.
- ^D Past distributions are not an indication of future distributions.
- ^E Prior to 19 September 2016, the fund's benchmark was the FTSE Emerging Markets All Cap China A Transition Index. Prior to 2 November 2015, the fund's benchmark was the FTSE Emerging Index.

Other	0.1	0.2

Sector categories are based on the Industry Classification Benchmark system ("ICB"), except for the "Other" category (if applicable), which includes securities that have not been provided an ICB classification as of the effective reporting period. Beginning September 2020, FTSE Russell is enhancing the ICB structures to provide additional granularity from the industry through subsector levels. Please note that there may be differences in sector names and classifications as these changes are implemented across the industry through March 2021.

Glossary

Median market cap is the midpoint of market capitalisation (market price multiplied by the number of shares outstanding) of the shares in the fund. Half the shares in the fund will have higher market capitalisation, half will have lower.

Price/Earnings ratio (P/E ratio) is a measure of the market value of a share compared to the earnings of the company. A share with a price of \$10, and earnings last year of \$1 a share, would have a P/E ratio of 10. For a fund, the ratio is the weighted average P/E ratio of the shares it holds. In general, a high P/E suggests that investors are expecting higher earnings growth in the future compared to companies with a lower P/E. Companies with negative earnings are excluded from the calculation.

Price/Book ratio is calculated by dividing the current market price of the share by the book value per share of the company.

Return on equity ratio is a measure of how much profit a company generates relative to its shareholders' equity. For a fund, the ratio is the weighted average return on equity ratio of the shares it holds.

Earnings growth rate is a measure of the trailing Earnings Per Share growth for a given company and share. For a fund, the rate is the weighted average earnings growth of the shares it holds.

Equity yield (dividend) is the dividend income earned by shares, expressed as a percentage of the market price of those shares. For a fund, the yield is the weighted average equity yield of the shares it holds.
